

Find the CareConnect link

Locate the CareConnect viewer link from an encounter.

For: Authorized clinicians

Before you start

- Access to the encounter and separate authorization to use CareConnect.

What you'll achieve

You can locate the CareConnect link and proceed to its separate sign-in.

1

Locate CareConnect

Find CareConnect in the encounter header. The viewer requires its own authorized sign-in. Confirm the patient in CareConnect before reviewing their information.

The screenshot displays the InToday patient encounter interface for Jeff Adams [MSP]. The header shows the patient's name, 'Standard Treatment', and a navigation bar with buttons for 'Full Chart', 'CareConnect', 'Prescribe', and 'Record'. A notification bar indicates '1 note is still unsigned from today.' The main content area is divided into two sections: 'Visit Stream' and 'Context'. The 'Visit Stream' section includes a text input field for AI interaction and a row of buttons for 'Clinical Notes', 'New Chart Entry', 'Book follow-up', 'Lab requisition', 'Prescription', 'Summary letter', and 'Code this visit'. The 'Context' sidebar on the right lists various patient information sections: 'Since Last Visit', 'Summary', 'Problem List', 'Recent Visits', 'Care Team Activity', 'Medications', 'Labs', 'Documents', and 'Dev'.
